CHAPTER 2 - DELIVERY PROCEDURES

Unit of Delivery

Delivery Size

Delivery is to be offered and accepted in lots of 5 MT Gross or multiples thereof. A quantity variation of +/- 2% is permitted as per contract specification.

Delivery Requests

The procedure for Castor seed delivery is based on the contract specifications as per Exhibit I. All the open positions shall have to be compulsorily delivered either by giving delivery or taking delivery as the case may be. That is, **“upon expiry of the contracts, any seller with open position shall give delivery of the commodity. The corresponding buyer with an open position as matched by the process put in place by the Clearing Corporation shall be bound to settle by taking physical delivery. In the event of default by seller to give delivery such defaulting seller will be liable to penalty as may be prescribed by the Clearing Corporation from time to time”**.

The penalty structure for failure to meet delivery obligations will be as per circular no. NCCL/CLEARING-035/2023 dated May 29, 2023.

The delivery request for Castor seed contracts will be on staggered basis where the tender period would be the last 5 trading days (including expiry day) of the contracts. During the Tender period, if any delivery is tendered by seller, the corresponding buyer having open position and matched as per process put in place by the Clearing Corporation, shall be bound to settle by taking delivery from the delivery center where the seller has delivered same.

The Buyers and the Sellers need to give their location preference through Web NCFE system provided by the Clearing Corporation. If the Sellers fail to give the location preference, then the allocation to the extent of his open position will be allocated to the base location.

Delivery Allocation

The Clearing Corporation would then compile delivery requests received from members during the Tender period and shall allocate delivery to buyers having open long position as per random allocation methodology to ensure that all buyers have an equal opportunity of being selected to receive delivery irrespective of the size or value of the position. However, preference may be given to buyers who have marked an intention of taking delivery. The buyer having open position and matched as per process put in place by NCCL, shall be bound to settle by taking delivery from the Approved warehouse where the seller effects delivery in accordance with the contract specifications.

The buyers / sellers who have to receive / give delivery would be notified on the same day after the close of trading hours. Delivery of Castor Seed is to be accepted by buyers at the Approved warehouse/s where the seller effects delivery in accordance with the contract specifications. On expiry, all outstanding position would be settled by giving / taking physical delivery.

Actual Delivery

Where **Castor seed** is sold for delivery in a specified month, the seller must have requisite electronic credit of such **Castor seed** holding in his Clearing Member's Pool Account before the scheduled date of pay in. On settlement the buyer's Clearing Member's Pool Account would be credited with the said delivery quantity on pay out. The Clearing Member is expected to transfer the same to the buyer's repository account. However, the buyer must take actual physical delivery of **Castor seed** before expiry of the validity date as indicated in the quality test report/Assayer's Certificate of the Assayer.

Approved Warehouse

NCCL has approved warehouses for receipt and delivery of **Castor seed**. **Castor seed** will be received and delivered only from the NCCL Approved warehouse. The updated list of Approved Warehouse can be accessed from the link:

No lower grade/quality shall be accepted in satisfaction of futures contracts for delivery except as and to the extent provided in the contract specifications.

Packaging

Castor seed should be delivered in bags of approximately 75 Kgs gross weight basis. Maximum number of bags in a lot of 5 MT should not be more than 68 bags in clean, dry, new or old B-twill bags in merchantable condition, or in any other accepted industry standard material with the mouth of the bags stitched disallowing sweating/spilling.

As the bags are old and there is a possibility that the bags may get torn/cut during handling at the warehouse, such bags will be mended and stitched by the WSP during outward delivery from the warehouse.

Standard Allowances

Standard allowance deducted per validation of quality on account of sampling and spillage for the goods deposited will be as given in the table.

	Fresh Deposit	Revalidation	Withdrawal
Standard Allowance	0.20%	Nil	Nil

Weight

The quantity of **Castor seed** received and / or delivered at the NCCL Approved warehouse would be determined / calculated by the designated weighbridge / weigh scale at the premises of the Approved warehouse or in its vicinity and the quantity so determined would be final and binding on all parties concerned.

Good / Bad delivery Norms

Castor seed delivery into NCCL Approved Warehouse would constitute good delivery or bad delivery based on the good / bad delivery norms as per **Exhibit 3**. The list contained in **Exhibit 3** is only illustrative and not exhaustive. NCCL would from time to time review and update the good / bad delivery norms retaining the trade / industry practices.

Castor seed Sampling

1. Sampling will be carried on 100% basis from the assaying/sampling lot from the bags. Samples are to be taken from each bag. Assaying/Sampling lot would be 10 MT Max.

2. 5% of the bags in the assaying lot subject to minimum 5 and maximum 10 bags randomly selected from each assaying lot will be cut open, contents spread on the floor and visually checked for presence of any material foreign to the commodity like stones, any plastic material or any substance which is not directly related to the commodity being sampled. Presence of these materials such as large pieces of pebbles, inferior quality or husk in the middle of bag, mixing of any apparent material which is not the actual commodity itself, if any will lead to rejection of the lot being sampled.

Further a sample from the bags cut open will be taken and checked for foreign matter. The FM content in the Assaying report will be entered higher out of the two matter values determined on the basis of the composite sample taken from the running sample as indicated in para 1 above and the sample

collected as per the process indicated in para 2 This will be then divided into 4 parts and distributed as under.

These samples will be distributed as under:

- One sample to Depositor
- One sample to Warehouse service provider
- One sample for Analysis by assayer
- One sample for record with assayer

Moisture Adjusted Weight

During Deposit:

Depositors whose goods are having moisture above the basis point will get electronic credit for the quantity brought less the standard deduction and further with reduction in weight by discount for moisture as defined in the contract specifications and product note. The weight after deducting standard deduction and moisture discount (by weight) will be credited to the depositors Repository beneficiary a/c by warehouse service provider. It may be clarified here that the lot being deposited should remain a deliverable lot even after deduction of standard allowance at the time of fresh deposit and reduction due to moisture being higher than the basis moisture as illustrated below:

Weigh bridge net weight at the time of deposit in MT	Standard allowance @ (0.2%) in MT	Moisture at the time of deposit in %	Quantity considered for MAW	Quantity credited to repository account (i.e. after application of MAW)	Deliverable / Not Deliverable
5	0.01	4.5	4.99	4.99	Deliverable
5	0.01	5	4.99	4.965	Deliverable
5	0.01	5.5	4.99	4.94	Deliverable
4.95	0.0099	5	4.9401	4.915	Deliverable
4.95	0.0099	5.5	4.9401	4.89	Not Deliverable

Warehouse has to deliver entire withdrawn quantity provided the lifting is done by EDD and the outbound moisture level is at basis point or below: Since the buyer will be buying the goods at basis moisture level after application of MAW at the time of deposit, if at the time of delivery out, the moisture level is higher than the basis moisture levels, the WSP has to also deliver the buyer the difference quantity proportionate to the higher moisture content.

Weight at Weighbridge during fresh deposits	Basis moisture Level	Inbound moisture results	Standard allowance	MAW	Credit to the beneficiary
5 MT	4.5%	5%	0.2%	0.5%	4.965 MT
		<u>Outbound Moisture</u>			<u>Quantity to be delivered by WSP to Buyer</u>
5 MT	4.5%	4 % (lower than basis)			4.965 MT
5 MT	4.5%	4.5 % (at basis)			4.965 MT

5 MT	4.5%	5% (higher than basis)			4.965 MT + 0.5 % as discount for moisture is provided on 1:1 basis in the contract specifications
5 MT	4.5%	5.5% (higher than basis)			4.965 MT + 1 % as discount for moisture is provided on 1:1 basis in the contract specifications

CHAPTER 3 - CLEARING AND SETTLEMENT

Daily Settlement

All open positions of a futures contract would be settled daily based on the Daily Settlement Price (DSP).

Daily Settlement Prices

The Daily Settlement Price (DSP) will be as disseminated by the Clearing Corporation at the end of every trading day. The DSP will be reckoned for marking to market all open positions.

Final Settlement Prices

The Final Settlement Price (FSP) will be determined by the Clearing Corporation upon maturity of the contract. All open positions on the expiry day of the contract would result in compulsory delivery.

FSP shall be arrived at by taking the simple average of the last polled spot prices of the last three trading days viz., E0 (expiry day), E-1 and E-2. In the event the spot price for any one or both of E- 1 and E-2 is not available; the simple average of the last polled spot price of E0, E-1, E-2 and E-3, whichever available, shall be taken as FSP. Thus, the FSP under various scenarios of non-availability of polled spot prices shall be as under:

Scenario	Polled spot price availability on				FSP shall be simple average of last polled spot prices on:
	E0	E-1	E-2	E-3	
1	Yes	Yes	Yes	Yes/No	E0, E-1, E-2
2	Yes	Yes	No	Yes	E0, E-1, E-3
3	Yes	No	Yes	Yes	E0, E-2, E-3
4	Yes	No	No	Yes	E0, E-3
5	Yes	Yes	No	No	E0, E-1
6	Yes	No	Yes	No	E0, E-2
7	Yes	No	No	No	E0

The Settlement Price for any delivery allocation during staggered period (i.e. up to one day prior to expiry) would be the last available spot price for the respective contract.

In case of non-availability of polled spot price on expiry (E0) due to sudden closure of physical market under any emergency situations noticed at the basis center, the Framework for Determination of Final Settlement Price (FSP) as laid down by NCDEX vide its circular No. NCDEX/TRADING-012/2019 dated April 05, 2019 shall be applicable.

Spot Prices

NCDEX will announce/ disseminate spot prices for Castor seed relating to the designated delivery center and specified grade/ quality parameters determined through the process of polling a set of market participants representing different segments of the value chain.

The polled prices shall be input to a normalizing algorithm (like 'bootstrapping' technique) to arrive at a representative, unbiased and clean 'benchmark' spot price for Castor seed. The security of data and randomness of polling process will ensure transparency and correctness of prices. The Exchange has absolute right to modify the process of determination of spot prices at any time without giving any notice to the market.

Dissemination of Spot Prices

Spot prices for **Castor seed** will be disseminated on daily basis.
